AD 7	12 year old Jesus Goes To Temple		26 yrs 2×13			
AD 33	Jesus To Cross New Testament era begins			1955 yrs $5 \times 17 \times 23$		

* This is the calendar period obtained by adding the Old Testament years to the New Testament years. The actual period that elapsed between these two events is one year less than the calendar year because there is no year 0. In addition to the evidence shown in this chart that Jesus was crucified in 33 A.D. there is much more evidence found in the Bible that this is so. Therefore, we can know that we are faithful to Scripture in understanding that God ties important spiritual events together both by the use of actual years as well as by the use of calendar years.

Note: Keep in mind that the numbers in the multiples each represent a spiritual truth.
